Complete One-Site Solution

Through our proven expertise and leadership in particle engineering, we ensure that your inhalation and nasal therapies are engineered for success from start to finish.

Inhalation and Nasal API with Bespoke Powder Properties

- Fluticasone Furoate
- Fluticasone Propionate
- Mometasone Furoate Anhydrous
- Mometasone Furoate Monohydrate
- Salmeterol Xinafoate
- Umeclidinium Bromide
- Vilanterol Trifenatate

Leading CDMO in Dry Powder Formulations Services

- Advanced particles, low to high dosage
- Unprecedented particle size control
- Spray drying; Wet polishing; Jet milling
- Formulation development services
- Full range of devices
- Precision capsule filling
- Small-scale to commercial manufacturing

Device Technology Innovator

Hovione offers simple, patented and globally competitive dry powder inhalers – Disposable, Capsule, Blister, Large Dose and High Performance DPIs – which are available for fully integrated turn-key development with formulation and for licensing.
