Spray Drying screening service for poorly soluble drugs

ASD-HIPROS, Hovione's Intelligent Proprietary Screening, is the most advanced and accurate tool to identify Amorphous Solid Dispersion formulations by Spray Drying with maximum performance and stability.

Identify optimal formulations based on performance

- Requiring as little as **5g** of API;
- Rapid screening for the best combination of drug loads, polymers and surfactants;
- Spray Drying of **up to 24** of the most promising formulations;
- Formulations analyzed for performance and stability;
- Turnaround in just **6 weeks**.

Detailed assessment report

- Formulation space definition;
- List of **24** viable formulations tested experimentally;
- Processed analytical results;
- Formulation ranking, identifying the best formulations;
- Options on how to proceed with your drug candidate.

3 Step Screening Process

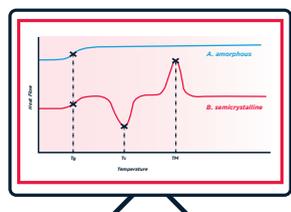

1 *In silico* Computational Screening

- Computational Modelling
- Initial screening ranking: *Thermodynamics; Kinetics; Physical stability*
- Reduction formulation space and candidate selection

2 Spray Drying Experimental Prototyping

- Spray Drying experiments
- 24 Lab-Scale prototypes
- Evaluation of multiple: Drug loads, Polymers and Surfactants

3 Analytical testing and Solid-state characterization

- Two-Step Bio-relevant Dissolution
- Modulated Differential Scanning Calorimetry
- One-Month Physical stability

ASD-HIPROS: A seamless experience for you and your drug candidate

- Requires minimal API – just **5g** of your API for the full service;
- Rational formulation definition using *in silico* computational modelling;
- Testing of a high number of Spray Drying prototypes (**up to 24**) to screen for most promising formulations;
- Rapid turnaround time in as little as **6 weeks**;
- Flexible operation space, maximizing formulation combinations with different drug loads, polymers and surfactants;
- Single point of contact for improved communication.

Secure path to clinical supplies with the leader in Spray Drying

Hovione is a CDMO with more than 15 years of accumulated experience and expertise in Spray Drying development and manufacture. Hovione offers a clear path to clinical supplies and commercialization by combining modeling capabilities and extensive process knowledge with manufacturing capacity and an excellent approval track record.
